Summary

Software engineering fresher with strong coding skills in Java and C++ and hands-on experience building backend applications using Spring Boot and REST APIs. Good understanding of Object-Oriented Programming, Data Structures and Algorithms, Operating Systems fundamentals, and Software Development Life Cycle (SDLC). Familiar with multithreading, relational databases, debugging, and system design concepts, with strong motivation to build scalable and reliable software systems.

Education

Chitkara University, Punjab

Bachelor of Engineering (B.E.) — Computer Science Engineering

2023 – 2027

CGPA: 8.11

Experience

Freelance Developer — Career Counseling Platform

2026

JavaScript, Node.js, Express.js, Firebase, HTML, CSS

- Developing a psychometric assessment platform, SCI-based recommendations, and dynamic report generation.

Live Demo

Technical Skills

Programming Languages: Java (Primary), C++, Python, JavaScript

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Software Development Life Cycle (SDLC)

Core Java: Collections Framework, Exception Handling, Java 8 (Streams, Lambdas)

Backend Development: Spring Boot, RESTful APIs, MVC Architecture, Microservices Concepts

Persistence and Security: Hibernate / JPA (ORM), Spring Security (Authentication Basics)

Databases: MySQL, MongoDB, CRUD Operations, Query Optimization

Tools and Platforms: Git, GitHub, Maven, Linux, Windows Development Environment, Postman

Cloud (Academic): AWS Basics (EC2, S3), Cloud Computing Concepts

Generative AI (Basic): LLM APIs (OpenAI/Gemini - basic usage), Prompt Engineering (basic), AI API Integration

Project Experience

Furniture Store Management System

2025

Java, Spring Boot, Hibernate, Maven, Postman, Eureka, JUnit5

- Developed a Java-based microservice application using Spring Boot and Maven for modular system design.
- Built an Order Tracking microservice integrated via Eureka with MySQL-based data handling for inventory and transactions.
- Implemented scalable backend services and APIs → GitHub

Personal Finance — Backend API

2025

Java, Spring Boot, REST APIs, MySQL

- Developed REST APIs for managing income and expense records with structured data handling.
- Designed relational database schema and implemented transaction-safe CRUD operations.
- Applied Java 8 features and concurrency concepts → GitHub

AgentInk — Multi-Agent AI Blog Generator

2026

Python, HTML, CSS, JavaScript, LangGraph, Groq

- Built an multi-agent system for generating and structuring AI-based blog content using LangGraph workflows.
- Integrated Groq-powered LLMs for fast content generation with efficient state handling and markdown-based storage.
- Developed a dynamic frontend for blog visualization and management — GitHub

Certification

Networking Fundamentals-Akamai Technologies

2024 — View Credential

Junior Cybersecurity Analyst Career Path

2025 — View Credential

Achievements

- Cash Prize — Chancellor, Chitkara University (Academic Excellence)
- Member of Coding Blocks technical club, successfully organized hackathons and tech events.
